

ABOUT US

Daejeon Health University was established in 1977 with the goal of cultivating human resources for national and social development under the guidance of philanthropy, diligence, and inquiry. In particular, it aims to train professionals who can contribute to the health field and the knowledge information society, which are fundamental to improving the quality of life.

Our state-of-the-art educational infrastructure, which meets the international standards, and the best professors in Korea are committed to helping 5,900 students become top professionals in the domestic healthcare industry. In addition, about 60,000 alumni who are working in medical institutions and various industries across the country are fully prepared to help and lead the next generation.
